Introduction

The 1985 Statistical Yearbook published by the Commodity Exchange, Inc. (COMEX) contains a compilation of pertinent information for every contract traded on the Exchange during 1985. The yearbook is divided into two volumes, one each for metals and options.

The yearbook for metals begins with a trading summary for 1985 and is then divided into four main sections—gold, silver, copper and aluminum. Each section includes opening prices, high and low prices, closing and settlement prices, volume, open interest, stocks and deliveries for every COMEX trading day. Additional tables on related U.S. producer and dealer prices and London gold and silver fixings are also listed.

We know this yearbook will prove to be a valuable source for financial and speculative users of futures markets and to students of commodities trading. Additional copies of this yearbook and previous issues are available for a nominal fee from the Commodity Exchange, Inc., (COMEX), 4 World Trade Center, New York, NY 10048 (212) 938-2937.

1985 Trading Summary

GOLD

The COMEX gold market exhibited periodic instances of price volatility in 1985, falling to five and a half year lows in February and then quickly rebounding to the upside in one of the largest one day rallies ever. Yet, throughout most of the year, trading was confined to a tight range. In fact, for the last nine months of 1985 the gold market fluctuated in a $30 range between $310 and $340 per troy ounce. Concerns over unrest in South Africa, instances of worldwide terrorism and the falling dollar supported the gold market. However, the lack of long-term inflation prospects combined with indications of physical selling at higher levels kept a lid on prices at higher levels.

The long-term downtrend, which pressured gold prices down by over $100 an ounce in 1984, culminated on February 25 as spot gold fell to a yearly low of $281.20. Diminished inflation concerns combined with the booming dollar were apparently the cause of gold's weakness.

Investor interest in gold gradually picked up near the end of the first quarter of 1985, when prices began to firm. In March, a sharp move developed in conjunction with the Ohio thrift crisis. A short covering rally boosted gold by over $38 in one day. The advance was supported by the weakening dollar and an infusion of new buying in gold as overseas investors manifested prevailing concerns that the Ohio difficulties might spread to other banks.

The gold market moderated after the mid-March rally, which saw spot gold reach $341. The supportive effects of the weaker dollar were more than offset by stagnant inflation and a focus on the potential for selling at higher levels. During the summer, however, the TWA highjacking combined with growing unrest in South Africa to produce another rally. Spot gold achieved a yearly high of $342.20 on August 19 before a bout of profit taking again pushed prices down toward $320.

Gold prices generally fluctuated between $320 and $330 for the balance of the year. Continued weakness in the dollar, lingering worries over South Africa and the stalled Middle East peace process supported the market while the lack of inflation and steady investor demand for stocks and private debt instruments constituted a bearish influence.

Gold futures volume at the Exchange reached 7,773,834 contracts traded in 1985 for a daily average of 30,849. The figures represent a 14.7 percent decrease from the previous year's levels. A new daily volume record of 106,964 contracts was set on March 19. Year-end open interest in gold futures was 132,243. Stock levels closed the year at 2,109,817 troy ounces. The year-end price of gold for 1985 was $329.00 per troy ounce.

SILVER

The COMEX silver market traded under considerable pressure in 1985. As the year progressed, traders focused heavily on abundant levels of silver inventories, particularly on the terminal markets. As a result, the market traded in a relatively tight range for the last half of 1985, encountering formidable resistance at $6.40 and generally fluctuating around the six dollar level.

Silver experienced its most consistent weakness during the first quarter of 1985. The decline, which coincided with a period of pronounced weakness in gold, was caused by a lack of inflation and the strength of the dollar.

After achieving a yearly low of $5.48 a troy ounce on March 12, the market began to retrace. Subsequently, concerns over the Ohio thrift crisis and a weakening dollar induced a rally. The market shot up to a yearly high of $6.89 on March 19 before quickly falling into a trading range of $5.80 to $6.40, which lasted for the balance of the year.

Although the dollar weakened in mid-year and the Federal Reserve increased money supply, silver was never able to transcend the bearish implications of increased inventories and reduced industrial demand.

Volume in COMEX silver futures totalled 4,821,206 contracts in the year constituting a daily average of 19,132 for a 28.5 percent drop from 1984. A depository stock record high of 156,505,276 troy ounces was reached on December 23 with the year-end level dipping slightly to 155,342,598 ounces. Open interest for silver futures at the close of 1985 was 86,140 contracts. At year-end, the price of silver was $5.826 per troy ounce.

COPPER

The copper market gained strength gradually in 1985. The yearly low of 55.70 cents per pound was recorded on January 2. And, while the market failed to launch a sustained rally, copper prices were generally supported by the unexpectedly strong economic expansion.

Copper's weakness during the beginning of 1985 was not unrelated to factors affecting the precious metals, as the strength of the dollar, reduced inflationary expectations and decreased consumption combined to keep prices below 60 cents during the first quarter. However, an early spring rally boosted prices to a yearly high of 65.65 cents on April 12. A shortage of prompt copper in Europe and backwardation in the LME market supplemented copper's upward initiative.

The market then retraced and settled into a trading range between 58 and 61 cents for several months. Copper advances were limited due to reduced consumption and fears that higher prices would cause the reopening of production facilities. A mild shortage of prompt supplies and the LME backwardation supported rallies during this period.

Copper prices finally breached the 61 cent resistance level in the fourth quarter of 1985. Prices increased to 64 cents as the market focused on the weaker dollar and the steady performance of such key copper consuming industries as automobiles and housing.

COMEX copper futures volume reached a total of 2,444,552 contracts in 1985 with a daily average of 9,701. This represented a 3.5 percent decrease from the preceding year. At the end of 1985, open interest for the contract was 77,790, with the year's final price per pound settling at 63.40 cents. Year-end stock levels closed at 120,603 short tonnes.

ALUMINUM

The aluminum market exhibited the simplest price patterns of all the COMEX metals in 1985. The market weakened for the first eleven months of the year, and then began a strong rally in December.

The market entered 1985 in the throes of a year-long downtrend. Aluminum prices experienced steady declines due to a combination of high production, weak demand and a strong dollar. Although the dollar began to weaken during the second quarter, aluminum, burdened by abundant inventory levels, continued to trend lower, falling below 50 cents and plunging to a low of 42.90 cents on September 17.

A concerted move by North American producers to reduce capacity, however, finally paid dividends late in the year. The market turned around and began to rally as traders focused on production levels. Declining inventory levels and the robust economy injected additional vigor into the rally. Short covering and indications of improved demand supplemented the advance and prices reached a yearly high of 52.70 cents per pound on December 16.

Aluminum futures volume for the year was 77,063 contracts for a daily trading average of 306, reflecting a decrease of 6.8 percent from 1984 levels. The COMEX year-end settlement for aluminum was 52.05 cents per pound. Stock levels at the end of 1985 were 36,838 short tonnes.

Contract Specifications

	GOLD	SILVER
Trading Unit	100 troy ounces	5,000 troy ounces
Price Multiples and Fluctuations	Price changes are registered in multiples of ten cents (10¢) per troy ounce. During any one market day, price fluctuations are limited to twenty-five dollars ($25) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in multiples of one-tenth of one cent (1/10 of 1¢) per troy ounce. During any one market day, price fluctuations are limited to fifty cents (50¢) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.
Trading Hours	9:00 AM to 2:30 PM New York Time	9:05 AM to 12:15 PM New York Time
Trading Months	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any February, April, June, August, October and December falling within a 23-month period beginning with the current calendar month.	Trading is conducted for delivery in the current calendar month, the next two calendar months, and such additional months as the Board of Governors may specify by resolution. Currently, trading is conducted in any January, March, May, July, September and December falling within a 23-month period beginning with the current calendar month.
Trading Symbol	GC	SI
Deliverable Grades and Contract Size	100 troy ounces (five percent more or less) of refined gold, assaying not less than 995 fineness, cast either in one bar, or in three one-kilogram bars and bearing a serial number and stamp of a refiner approved and listed by COMEX.	5,000 troy ounces (six percent more or less) of refined silver, assaying not less than 999 fineness, in bars cast in weights of 1,000 or 1,100 troy ounces and bearing a brand approved and listed by COMEX.

	COPPER	ALUMINUM
Trading Unit	25,000 pounds	40,000 pounds
Price Multiples and Fluctuations	Price changes are registered in multiples of five one-hundredths of a cent (5/100 of 1¢) per pound. During any one market day, price fluctuations are limited to five cents (5¢) per pound above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in multiples of five one-hundredths of a cent (5/100 of 1¢) per pound. Trading Symbol	CU	AL
Deliverable Grades and Contract Size	25,000 pounds (two percent more or less) of electrolytic, lake, or certain types of fire-refined copper. The basis grade is electrolytic copper cathodes. Fire-refined high conductivity copper and lake copper are deliverable at the contract (basis) price. Depending on the particular refinery shape, electrolytic copper is deliverable at a premium of 5/8¢ or 1/4¢ per pound above the contract price. Fire-refined copper is deliverable at a discount of 1/8¢ per pound below the contract price. All deliverable copper must conform to specifications established by the American Society for Testing and Materials for the particular shape and grade involved and be of a brand approved and listed by COMEX.	40,000 pounds (two percent more or less) of virgin primary aluminum grade P1020A (in ingots, sows or T-bars) during one of the specified futures months. At the option of the seller, primary aluminum grade P1535A (in ingots, sows or T-bars) may also be delivered against the aluminum contract at a discount of one cent ($.01) per pound. Each lot must be composed entirely of one grade and shape. All deliverable aluminum must either a) bear the brand or distinguishable mark of an approved smelter, or b) be accompanied by a declaration of a COMEX clearing member as to the origin of the aluminum. Each lot of deliverable aluminum must be accompanied by the producer's heat analysis or by a certificate of analysis from a COMEX-approved assayer.

KEY TO ABBREVIATIONS

Opening Prices

@: Signifies an opening during which no trades were effected for the contract month. The quote which precedes the "@" is the prevailing bid in the market during the opening period while the price following the "@" represents the prevailing offer.

T: Signifies that at least one transaction was effected during the opening period. If transactions were effected at more than one price during the opening period in a contract month, the high and low prices for such months are shown surrounding the "T".

Closing and Settlement Futures Prices

C = Closing Price
S = Settlement Price
T = Traded price/prices

Introduction

The 1985 Statistical Yearbook published by the Commodity Exchange, Inc. (COMEX) contains a compilation of pertinent information for every contract traded on the Exchange during 1985. The yearbook is divided into two volumes, one each for metals and options.

The yearbook for options begins with a trading summary for 1985 and is then divided into two main sections—gold options and silver options. Each section includes high and low prices, closing and settlement prices, volume and open interest for puts and calls for every COMEX trading day. In addition, there is also a table listed for 1985 exercises.

We know this yearbook will prove to be a valuable source for financial and speculative users of futures and options markets and to students of commodities trading. Additional copies of this yearbook and previous issues are available for a nominal fee from the Commodity Exchange, Inc., (COMEX),

Trading Summary

Gold Options

Volume in COMEX options on gold futures achieved 1,395,896 contracts for an average of 5,539 options trading daily in 1985. This represents a drop of 2.6 percent from 1984. New daily, weekly and monthly records were set in March. On March 20, a high of 28,352 options traded in one day. The week ending March 22 achieved a record volume of 82,053 contracts and volume for the month reached a record total of 212,375. Open interest in the option at the end of 1985 was 70,366.

Silver Options

Options on COMEX silver futures concluded its first full calendar year of trading with a volume total 531,315 contracts and a daily trading average of 2,108. This new contract was introduced on October 4, 1984. March proved to be the most active month for the contract with a daily record of 9,069 set on March 19, a weekly high of 26,507 reached the week ending March 22, a monthly record of 72,588 set for the month, and an open interest high of 46,230 contracts set on March 29. Open interest at the close of 1985 was 35,207.

Contract Specifications

	GOLD OPTIONS	SILVER OPTIONS
Trading Unit	Underlying asset is equal to one Comex gold futures contract.	Underlying asset is equal to one Comex silver futures contract.
Price Multiples and Fluctuations	Price changes are registered in multiples of ten cents (10¢) per troy ounce. Strike Price Increments: $10/oz. apart for strike prices below $300. $20/oz. apart for strike prices between $300 and $500. $30/oz. apart for strike prices between $500 and $800. $40/oz. apart for strike prices above $800. On the first trading day there will be five strike prices each for puts and calls.	Price changes are registered in multiples of one-tenth of one cent (1/10 of 1¢) per troy ounce. Strike Price Increments: $.25/oz. apart for strike prices below $5.00. $.50/oz. apart for strike prices between $5.00 and $15.00. $1.00/oz. apart for strike prices above $15.00. On the first trading day there will be seven strike prices each for puts and calls.
Trading Hours	9:00 AM to 2:30 PM New York Time	9:05 AM to 2:25 PM New York Time
Trading Months	The nearest four of the following contract months: February, April, June, August, October and December.	The nearest four of the following contract months: March, May, July, September and December.
Trading Symbol	OG	SO
Last Trading Day	Second Friday of the month prior to the delivery month of the underlying futures contract.	Second Friday of the month prior to the deliv[illegible]onth of the underlying futures con[illegible]
Deliverable Grades and Contract Size	Exercise: Until 3:00 PM N.Y. time on any business day for which the option is listed for trading. Upon exercise, option holders receive the appropriate short or long COMEX gold futures contract by way of a book entry. Writers of options who receive a notice of exercise are assigned the opposite futures position.	Exercise: Until 3:00 PM N.Y. time on any business day for which the option is listed for trading. Upon exercise, option holders receive the appropriate short or long COMEX silver futures contract by way of a book entry. Writers of options who receive a notice of exercise are assigned the opposite futures position.

Introduction

The 1986 Statistical Yearbook published by the Commodity Exchange, Inc. (COMEX) contains a compilation of pertinent information for every contract traded on the Exchange during 1986. The yearbook is divided into two volumes, one each for metals and options.

The yearbook for metals begins with a trading summary for 1986 and is then divided into four main sections—gold, silver, copper and aluminum. Each section includes opening prices, high and low prices, closing and settlement prices, volume, open interest, stocks and deliveries for every COMEX trading day. Additional tables on related U.S. producer and dealer prices and London gold and silver fixings are also listed.

We know this yearbook will prove to be a valuable source for financial and speculative users of futures markets and to students of commodities trading. Additional copies of this yearbook and previous issues are available for a nominal fee from the Commodity Exchange, Inc., (COMEX), 4 World Trade Center, New York, NY 10048 (212) 938-2937.

1986 Trading Summary

Commodity Exchange, Inc. finished 1986 with total trading volume of 16,528,415 contracts, the fifth highest in the Exchange's 53-year history. Gold volume finished the year at 8,400,175 contracts, an increase of eight percent over 1985. All options contracts totaled 2,353,717 in 1986, compared with 1,927,211 for 1985. Despite relatively quiet markets in silver, copper and aluminum, **COMEX** retained its standing as the nation's third largest commodity exchange.

GOLD

Last year, gold prices rose during 1986 with sustained volume. Three factors supported the market: a weak U.S. dollar, extraordinarily high Japanese demand and unrest in South Africa. Secondary factors were periodic instances of international tension, U.S. debt concerns and the strength of the platinum market.

Gold traded in the high $300 range for most of the year with a rally beginning in August that culminated on October 8 with a high spot price of $443. After that, prices edged downward, with spot gold closing the year at $405.

Competition from dollar-denominated financial assets and reports of strong Soviet bullion sales limited gold's rallying ability throughout the year. But, in the last analysis, significant volatility attracted investor interest in gold and contributed to a strong showing for the gold market in 1986.

Generally, the specter of disrupted gold supply from South Africa created strong investor interest. Uncertainty about future South African policies and the imposition of state-of-emergency decrees caused support for gold throughout the year.

The gold market's reaction to civil unrest in South Africa is not surprising. South Africa accounts for the lion's share of free world production of gold – about 70 percent throughout the 1980's. Although this percentage has declined in recent years, the market is still sensitive to anything that could disrupt South African gold output. South Africa, combined with strong Japanese demand and a weaker U.S. dollar, created a floor for gold over the entire year.

Aggressive Japanese gold purchases also spurred prices. Record-low yen/gold prices and the minting of the Hirohito 60th anniversary coin caused a sharp increase in Japanese bullion imports.

Between 1983 and 1985, Japanese gold imports averaged less than six million ounces a year. In 1986, Japan increased imports to more than 11 million ounces over the first six months of the year. For the year, Japan reportedly posted imports of 21.6 million ounces, more than 350 percent over 1985 levels. Overall, Japanese gold demand during 1986 totaled 42.6 percent of total free world supplies. These Japanese purchases supported the gold market on breaks toward $360 and set the stage for late summer advances over the $400 level.

A weak U.S. dollar also helped support gold. Although a less significant factor compared to Japanese demand and South African unrest, in 1986 the U.S. currency periodically but consistently dominated short-term movements in gold. Late in the year, the sharp decline of the dollar against the West German mark and a mild renewal of dollar/yen weakness helped push gold prices back to $400.

Secondary and transitory factors affecting gold included incidents of international tension and U.S. debt concerns. Worries over possible recurrence of the late-1985 terrorist bombings in airports in Rome and Vienna and the U.S. air attacks on Libya in 1986 created an air of international uncertainty. This solidified support for gold around $350 and encouraged subsequent rallies.

The lack of international confidence in the Baker plan on LDC debt also caused uncertainty that increased gold prices. Questions whether Brazil, Argentina, Venezuela and the Philippines could service their foreign debts and the weakness in the banking system spurred by energy and agricultural slowdowns contributed to gold strength during 1986.

Despite all this, moderate inflation and the possibility of Soviet bullion sales created a gold ceiling below $450. Both these fundamental forces stemmed from OPEC discord and resultant low energy prices. For example, low oil prices moderated general price levels, which limited investor demand for inflation hedges like gold. Similarly, indications that the Soviet Union, in an effort to keep up its foreign exchange earnings, increased its bullion sales also were a factor in limiting gold advances. Finally, the competitive pressures from the strong stock and bond market drained some investment dollars from gold.

All in all, gold had a good year. It was a market that displayed considerable volatility, liquidity and good price support.

Silver

Unlike gold, silver failed to rally significantly in 1986. Silver prices meandered lower during the first half, falling from six dollars to around five dollars. Prices recovered slightly from the year low in the fourth quarter, trading in the area of five and one-half dollars. Volume was lower than the previous year by 20 percent.

The main reason for lower trading volumes was reduced price volatility. The market traded in a narrow band, encountering support against five dollars and significant resistance on rallies over six dollars.

Silver rallies in 1986 were limited by the metal's supply/demand balance. Sustained output from Mexico and Peru and ample levels of secondary sources resulted in a surplus supply of silver throughout the 1980's. Between 1980 and 1985, the excess of silver supply over demand exceeded 600 million ounces. These abundant stock levels generally held silver below six dollars.

Abundant supplies also were partially responsible for silver's weakness relative to gold. The gold/silver ratio, which historically had traded around 35:1, substantially widened during 1986. Gold, buoyed by South African concerns and Japanese purchases, outperformed silver throughout the year. The ratio rallied through its previous record high around 60:1 and peaked around 77:1 during the third quarter before settling back to about 70:1.

Silver prices did, however, encounter support at about five dollars. This was because the silver market was in more of a fundamental balance in 1986. The two largest U.S. mines, Lucky Friday and Sunshine in Idaho, were closed during the first half of the year. As a result, domestic production of silver fell almost 15 percent in 1986. Although Canadian, Mexican and Peruvian silver production remained at relatively high levels, total world production actually fell slightly. Low prices also limited secondary supplies of silver.

At the same time, coinage and industrial demand for silver increased in 1986. As a result, preliminary indications are that silver supply and demand were almost balanced in 1986. Improved fundamentals supported silver on sell-offs below five dollars. Previous year surpluses, however, limited the development of a sustained advance. So, the silver market traded within a narrow price range in 1986, a prisoner of its own past bearish fundamentals.

Copper

For most of 1986, copper prices fluctuated around the low 60-cent-per-pound level. The price hit a low of 57 cents and a high of 69 cents, reflecting a narrow range of trading throughout the year.

Although the market tried several times to rally during the first quarter, prices generally faltered. What early year advances there were stemmed from declining inventory levels, bullish seasonal trends and concerns over possible labor problems in the copper mining industry.

Reduced inventories constituted a key influence behind the advance in copper. For example, LME inventories fell to a year low at around 130,000 metric tons in April of 1986. Similarly, COMEX stocks fell to their lowest levels of the 1980's. In June of 1986, domestic producer stocks reached a nadir at 77,000 metric tons, the lowest level since 1983. By July of 1986, total stocks of refined copper in the world fell to less than 900,000 metric tons, also the lowest level of the decade.

The potentially bullish impact of relatively low levels of copper stocks was offset by declining copper demand. For example, weak demand caused prices to drift below 60 cents during the summer. Concerns over the weak industrial sector exacerbated the bearish effects of reduced consumption.

Although the weak dollar and gold-related sympathetic buying supported copper prices on sell-offs below 58 cents, the market was unable to maintain a sustained advance and ended the year under some pressure. Prices generally trended around the 60 cent level throughout the last quarter of 1986.

In general, 1986 was a year in which the copper market was unable to resolve the influences of conflicting fundamental forces. Although the weak dollar and dissipating inventory levels constituted a supportive influence throughout the year, the weak industrial sector and faltering demand limited advances.

Aluminum

The COMEX aluminum market maintained a 12 cent trading range in 1986. The market could not sustain advances over 60 cents per pound or below 48 cents. For most of the year, prices stayed between 51 and 54 cents, with light volume.

Aluminum prices exhibited an upside bias during the first half of 1986. The market rose to 60 cents as traders worried about prospects for an aluminum labor strike. Many commercial users increased orders during the spring to meet demand if production ceased.

This precautionary buying led to a substantial increase in orders. Domestic orders, which totaled 7.1 million metric tons in 1985, ballooned to a record 2.6 million tons during the first three months of 1986. In fact, between January 10 and March 14, average weekly order levels were higher than any one week during the previous six years.

Also contributing to the early year advance in aluminum prices were reduced levels of domestic primary production. In June, the strike at Alcoa and five other domestic smelters supported prices.

Although these strikes underpinned the aluminum market, prices gradually weakened. The peaceful resolution of most aluminum labor problems and the gradual dissipation of demand levels pressured prices. Market participants became aware of steady levels of secondary aluminum recovery and a sharp increase in ingot imports.

For example, aluminum orders from April through September totaled only 3.1 million metric tons. While total 1986 orders exceeded 1985's robust levels, aluminum demand fell sharply from first quarter levels. Aluminum prices also were pressured by the increase in world inventories through the second and third quarters of the year. Prices dropped to 48 cents in November before firming slightly at year-end.

Varying degrees of price volatility characterized aluminum trading during 1986. High levels of pre-strike precautionary buying in the spring and related purchases on COMEX boosted prices. This rally was not sustainable without an extension of strong demand. The subsequent decline in prices, however, provided equally good trading opportunities.

Contract Specifications

	GOLD	SILVER
Trading Unit	100 troy ounces	5,000 troy ounces
Price Multiples and Fluctuations	Price changes are registered in multiples of ten cents (10¢) per troy ounce. During any one market day, price fluctuations are limited to twenty-five dollars ($25) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.	Price changes are registered in multiples of one-tenth of one cent (1/10 of 1¢) per troy ounce. During any one market day, price fluctuations are limited to fifty cents (50¢) per troy ounce above or below the settlement price established on the preceding business day. If, on two consecutive days, the settlement price for any contract month (not necessarily the same month) changes by the price fluctuation limit, a system of expanded limits becomes effective. Price fluctuation limits do not apply to the current delivery month.

Deliverable Grades and Contract Size	25,000 pounds (two percent more or less) of electrolytic or certain types of fire-refined copper. The basis grade is Grade 2 electrolytic cathode copper. Grade 1 electrolytic cathode copper and electrolytic copper ingot bar are deliverable at premiums over the basis grade of 1 1/2¢ and 1/4¢ per pound, respectively. Fire-refined high conductivity ingot bar and electrolytic copper wire bar are deliverable at the contract (basis) price. Fire-refined copper ingot bar is deliverable at a discount of 1/8¢ per pound. All deliverable copper must conform to specifications established by the American Society for Testing and Materials for the particular shape and grade involved and be of a brand approved and listed by COMEX.	40,000 pounds (two percent more or less) of virgin primary aluminum grade P1020A (in ingots, sows or T-bars) during one of the specified futures months. At the option of the seller, primary aluminum grade P1535A (in ingots, sows or T-bars) may also be delivered against the aluminum contract at a discount of one cent ($.01) per pound. Each lot must be composed entirely of one grade and shape. All deliverable aluminum must either a) bear the brand or distinguishable mark of an approved smelter, or b) be accompanied by a declaration of a COMEX clearing member as to the origin of the aluminum. Each lot of deliverable aluminum must be accompanied by the producer's heat analysis or by a certificate of analysis from a COMEX-approved assayer.

ABBREVIATIONS AND FOOTNOTES

Opening Prices

@: Signifies an opening during which no trades were effected for the contract month. The quote which precedes the "@" is the prevailing bid in the market during the opening period while the price following the "@" represents the prevailing offer.

T: Signifies that at least one transaction was effected during the opening period. If transactions were effected at more than one price during the opening period in a contract month, the high and low prices for such months are shown surrounding the "T".

Introduction

The 1986 Statistical Yearbook published by the Commodity Exchange, Inc. (COMEX) contains a compilation of pertinent information for every contract traded on the Exchange during 1986. The yearbook is divided into two volumes, one each for the metals and options.

The yearbook for options begins with a trading summary for 1986 and is then divided into three main sections—gold options, silver options and copper options. Each section includes high, low and settlement prices, volume and open interest for puts and calls for every COMEX trading day. In addition, there are tables listed for 1986 exercises.

We know this yearbook will prove to be a valuable source for financial and speculative users of futures markets and to students of commodities trading. Additional copies of this yearbook and previous issues are available for a nominal fee from the Commodity Exchange, Inc. (COMEX), 4 World Trade Center, New York, NY 10048 (212) 938-2937.

1986 Trading Summary

1986 proved to be another banner year for the COMEX options markets. In April, options on copper futures were introduced. The contract has grown steadily since its inception and is currently utilized by investors and commercial hedgers. Options volume on COMEX totaled a record 2,353,717 contracts in 1986, 22 percent higher than 1985. In addition, many other volume and open interest records were established by COMEX options products.

GOLD OPTIONS

The gold options market continued to grow in 1986 and currently stands among the most successful options contracts on U.S. futures exchanges. Volume totaled a record 1,646,791 contracts, 18 percent higher than 1985 levels. A monthly volume record of 237,712 contracts was established in September.

Sustained high levels of open interest are also indicative of the success the gold options market enjoyed during 1986. At year's end, total open interest stood at 90,862 contracts, 29 percent higher than levels prevailing at the end of 1985. In mid-November gold options open interest peaked at 123,765 contracts, with call open interest totaling a record 72,000 contracts.

SILVER OPTIONS

The silver options market also established record volume levels. Total volume stood at 579,425 contracts, nine percent higher than 1985 levels. During September, a monthly volume record of 84,623 contracts was established. A record 26,645 contracts were traded during the week ending September 12. On November 13 silver options open interest reached a record 56,323 contracts.

Steady levels of open interest and gradually expanding levels of activity suggest that the silver options market will continue to grow and add to the success it has already enjoyed. It is noteworthy that the options market was able to achieve record levels of activity during a year when silver prices were relatively stable.

COPPER OPTIONS

As the newest COMEX contract, copper options appear poised to emulate the success of the gold and silver options markets. For example, on the last trading day of the year, copper options open interest totaled a record 33,322 contracts.

Volume levels also have exhibited steady levels of growth. Avera[illegible]ly volume of 508 contracts is impressive for a market that is less than nine months old. A rec[illegible]066 copper options contracts changed hands on August 29. During November, a monthly record of 2,[illegible]7 contracts were traded. Total annual volume of 127,501 contracts also hints at the potential for further growth.

Contract Specifications

	GOLD OPTIONS	SILVER OPTIONS
Trading Unit	Underlying asset is equal to one Comex gold futures contract.	Underlying asset is equal to one Comex silver futures contract.
Price Multiples and Fluctuations	Price changes are registered in multiples of ten cents (10¢) per troy ounce. Strike Price Increments: $10/oz. apart for strike prices below $400. $20/oz. apart for strike prices between $400 and $600. $30/oz. apart for strike prices between $600 and $900. $40/oz. apart for strike prices above $900. On the first trading day there will be nine strike prices each for puts and calls.	Price changes are registered in multiples of one-tenth of one cent (1/10 of 1¢) per troy ounce. Strike Price Increments: $.25/oz. apart for strike prices below $8.00. $.50/oz. apart for strike prices between $8.00 and $15.00. $1.00/oz. apart for strike prices above $15.00. On the first trading day there will be nine strike prices each for puts and calls.
Trading Hours	9:00 AM to 2:30 PM New York Time	9:05 AM to 2:25 PM New York Time
Trading Months	The nearest four of the following contract months: February, April, June, August, October and December.	The nearest four of the following contract months: March, May, July, September and December.
Trading Symbol	OG	SO
Last Trading Day	Second Friday of the month prior to the delivery month of the underlying futures contract.	Second Friday of the month prior to the delivery month of the underlying futures contract.
Expiration	Exercise: Until 3:00 PM N.Y. time on any business day for which the option is listed for trading. Upon exercise, option holders receive the appropriate short or long COMEX gold futures contract by way of a book entry. Writers of options who receive a notice of exercise are assigned the opposite futures position.	Exercise: Until 3:00 PM N.Y. time on any business day for which the option is listed for trading. Upon exercise, option holders receive the appropriate short or long COMEX silver futures contract by way of a book entry. Writers of options who receive a notice of exercise are assigned the opposite futures position.

COPPER OPTIONS

Trading Unit	Underlying asset is equal to one COMEX copper futures contract.
Price Multiples and Fluctuations	Price changes are registered in multiples of five one-hundredths of a cent (5/100 of 1¢) per pound. Strike Price Increments: $.01/lb. apart for strike prices below $.40. $.02/lb. apart for strike prices between $.40 and $.80. $.05/lb. apart for strike prices above $.80. On the first trading day there will be seven strike prices each for puts and calls.
Trading Hours	9:25 AM to 2:00 PM New York Time
Trading Months	The nearest four of the following contract months: March, May, July, September and December.
Trading Symbol	OP
Last Trading Day	Second Friday of the month prior to the delivery month of the underlying futures contracts.
Expiration	Exercise: Until 3: 00 PM N.Y. time on any business day for which the option is listed for trading. Upon exercise, option holders receive the appropriate short or long COMEX copper futures contract by way of a book entry. Writers of options who receive a notice of exercise are assigned the opposite futures position.
